Noida, India

### PROFILE

Senior Full Stack Software Engineer with **6+ years of experience** building **scalable AI, cloud, and enterprise platforms**. Expertise in **React, FastAPI, Python, Docker, and solution architecture**, with a proven record of leading end to end product delivery and building scalable, production ready systems. Passionate about building maintainable systems, mentoring engineers, and turning complex technical challenges into impactful products.

### CORE EXPERTISE

AI Platforms • Solution Architecture • Full-Stack Development  
• Enterprise Applications • Technical Leadership

### EDUCATION

#### Bachelor of Engineering Computer Engineering

Institute of Engineering and  
technology, Indore  
2015 - 2019

### LANGUAGES

- English
- Hindi

### TECH SKILLS

#### Languages

Python • TypeScript • JavaScript • SQL

#### Frontend

React • Next.js • React Native • Dash

#### Backend

FastAPI • Django • REST APIs

#### Cloud / DevOps

Docker • Kubernetes • Azure • CI/CD

#### AI

LLMs • Gen AI • LangChain • RAG  
• Agentic workflows

### KEY SKILLS

- Agile Delivery
- Stakeholder Management
- Cross-functional Collaboration
- Project Planning & Execution
- Requirements Gathering & Product Discovery
- Team Mentoring & Code Reviews
- Process Optimization
- Strategic Problem Solving

### WORK EXPERIENCE

July 2025 - Sept 2025 Senior Software Engineer | Neuralix.ai

#### Saarthi - AI Powered Office Suite

- Automated the architecture and end to end development of a secure, **on premise AI platform for a defence client** using React(TypeScript), FastAPI, SQL, Docker, and **NVIDIA H200 GPUs, delivering the first production ready release in under 3 months.**
- Led the development of an **AI powered office suite** and helped build the foundation for a proprietary **enterprise LLM platform, reducing** the time spent on day to day administrative tasks by approximately **50%.**
- Built a containerised deployment pipeline for **air gapped environments**, making **on premise deployments** secure, repeatable, and easy to manage.
- Implemented the overall system architecture and led the engineering effort from initial design through the successful delivery of the **first phase in under 3 months.**
- Established robust Git workflows and repository standards, accelerating code integration and **reducing** release cycles by **20%** leading to more consistent software delivery.

## WORK EXPERIENCE

Nov 2023 - May 2025    Software Engineer | Builder.ai

### CloudLens - Cloud Pricing Calculator

- Architected a **high performance Cloud Scale Pricing Calculator** using React.js, Next.js, and Django, delivering a scalable and maintainable solution.
- Reduced pricing computation time from **3+ days to within 90 minutes** via streamlined cost modelling, significantly **improving** operational **efficiency** and **accelerating** customer **workflows**.
- Spearheaded the project delivery by collaborating with product managers, designers, and backend engineers in an **agile** environment to deliver customer centric features via **iterative enhancements**.

### Guardian - AI Enabled Support Platform

- Engineered an internal support platform using **React.js, Django, Celery** and **API integration**, improving project operations and support workflows.
- Improved operational efficiency and reduced **response times by 30%** through workflow automation and enhanced tooling.
- Maintained **reusable frontend architecture, component libraries**, and code quality standards through peer code reviews, improving development consistency and maintainability.

Aug 2019 - Oct 2023    Analytics Consultant | MuSigma Inc.

### Supply Chain System Health

- Developed an executive supply chain health dashboard for the world's largest confectionery manufacturer using **Python, Dash, and Plotly**.
- Built end to end data flows to provide 360 degree visibility into supply chain health, reducing bottleneck **detection time by 20%**.
- Led solution delivery from concept to production, collaborating with business stakeholders to improve operational decision making.

### BlueYonder SaaS Migration and DevOps & Analytics Platform Support

- Led a team of 5 engineers to migrate **150+ data** assets from legacy JDA systems to a BlueYonder cloud-based SaaS platform, designing reusable data pipelines across **13+ solutions, 17 reports, and 88 views**.
- Delivered the migration in 3 months, **saving 2+ PB of storage**, reducing storage **costs by ~30%**, and **contributing to \$300K** in repeat business.
- Improved **DevOps practices** across **90+ analytics products**, leading a **15 member team** to improve platform reliability, **reduce issue turnaround time by 40%**, and **decrease maintenance incidents by 25%**.

### Enhanced Customer Quota Tool

- Designed and planned a web based **quota allocation** platform using **React, Django, Python, and SQL** to **automate** manual business processes.
- **Reduced** quota processing time from **10 days to 10 minutes**, enabling faster decision making and **contributing to \$17M/year** in business impact.
- Owned feature development and collaborated with key stakeholders to build analytics driven workflows for global rollout.

## PERSONAL PROJECT

Oct 2025 - Present    Career Break (Maternity Leave) | Independent Product Development

### RunUp and Kalay

- Took a planned career break for maternity while continuing to build technical expertise through hands on development of a cross platform mobile application using **React Native, FastAPI, Firebase, and Expo**.
- Implemented features including authentication, booking, slot management, and push notifications.
- Continued learning **AI application development, LLM integration**, and modern software architecture through personal projects and experimentation
